PROFESSIONAL SUMMARY

Computer Engineering student specializing in Generative AI and backend development, with hands-on experience in building RAG-based systems, AI assistants, and Agentic AI workflows. Skilled in developing real-world AI applications using Python and FastAPI, with a focus on performance optimization and automation.

TECHNICAL SKILLS

Programming Languages:	Python, C#, JavaScript, C/C++
AI/ML & Large Language Models:	Generative AI, Agentic AI, RAG, Finetuning, Embeddings, MCP
Frameworks & Technologies:	LangChain, FastAPI, PostgreSQL, n8n, Ollama, OpenAI, Vosk

COMPETITIVE EXPERIENCE

Runners-Up | SAMARTHA Hackathon (36 Hours) MBU, Andhra Pradesh

- Architected a zero-trace military messaging application within 36 hours, eliminating 100% of leftover message blueprints to render unauthorized chat tracing impossible.
- Engineered multi-layered privacy protocols utilizing temporary identity codes and biometric heart-rate monitors, complete safeguarding communications against physical device theft vulnerabilities.

TECHNICAL PROJECTS

1. Ultimate AI Voice Assistant

- Deployed a hybrid OpenAI/Ollama LLM architecture integrated with Google and Vosk speech recognition, slashing cloud latency to <1s while securing 100% of offline data via JSON with standard 3-7s response times.
- Programmed hot-word detection and OS-level integrations to automate commands, eliminating 65% of manual OS navigation while achieving up to 95% overall transcription accuracy.

2. AI Powered Job Preparation Platform

- Engineered a Python/React.js/FastAPI career accelerator that overhauled standard LMS architectures with AI assessments, automating evaluations and generating personalized roadmaps to achieve 90% accuracy in targeted skill improvement.

3. PDF Translator

- Developed a chunk-processing translation engine using "ai4bharat/indictrans2-en-indic-1B", executing structural parsing algorithms that achieved 95% translation and 98% formatting accuracy to eliminate 100% of manual post-translation reformatting for large PDFs.

4. Smart Meeting Notes (SaaS Platform)

- Launched a GenAI SaaS platform translating live conversations into structured insights, automating summaries to reduce post-meeting administrative overhead by 100%.

LEADERSHIP & VOLUNTEERING

Google Student Ambassador, MBIT | 2025 - 2026

- Led a Gemini orientation for 160+ students on advanced features (Pro, Nano Banana 2, Veo), securing 1-year free subscriptions to drive campus adoption.

IT & Technical Support Head, CVMU International Conference | 2024

- Directed the live streaming infrastructure and hybrid Google Meet integrations, bridging communication gaps for 100+ global delegates while delivering 100% uptime with zero disruptions.

Training & Placement Coordinator, MBIT | 2025 - Present

- Centralized placement data and streamlined institutional operations as the core student-leadership liaison, organizing professional seminars that accelerated interview readiness and optimized workflows for 5+ development initiatives.

Social Media Account Handler, MBIT | 2023 - Present

- Curated targeted digital content across institutional platforms, expanding the digital footprint of 10+ campus initiatives and driving measurable student engagement.

EDUCATION

B. Tech. - Computer Engineering, MBIT College of CVM University, Anand (9.35 CGPA)

2023 - 2027
